

## Description for Watercolor painting workshop

The pond that we will be painting is a beautifully designed masterpiece at a private residence in Edgewood, Washington. The light through the surrounding trees bathes different areas of the pond at different times of the day. You will be supplied with a top-quality watercolor paper with a minimal sketch in general shapes, and the use of supplies for the day. You will also receive both a black/white and a color reference for your painting. As our time for painting is limited to few hours, I have decided that we will work very directly and loosely. You will learn several patterning techniques and even learn to paint with a credit card. I am sure that you will thoroughly enjoy the experience and leave with a very lovely and personal piece of art
